

# EXPLORING ENGINEERING ACADEMY

Help us make a difference in our community.

**June 5-10, 2016 at Georgia Tech**

Have you ever wondered what makes a roller coaster stay on the tracks in the middle of an inverted loop? Or how electricity instantly turns on your lights even though the power plant is miles away?

This summer, from *June 5-10, 2016*, 70 students will get the chance to explore these questions by working hands-on with some of Atlanta's top engineers.

The 2016 Exploring Engineering Academy is a once-in-a-lifetime experience for 9th-12th graders to live on the Georgia Tech campus and get behind the scenes access to more than 30 Atlanta-area companies.

A one of a kind Engineering Academy where you combine STEM and fun! Learn how different STEM concepts impact you every day, then experience these principles first-hand as you fly through roller coasters at Six Flags, build robots and race them against your peers, and explore the Georgia Aquarium.

Additionally, participants get a taste of college life at one of the top engineering schools in the country. During the week at the Academy, participants will stay in the dorms at the Georgia Institute of Technology. They will meet actual engineering students and learn from them what it takes to succeed at one of the nation's most respected universities.
